INDEX TO VOLUME 87

SUBJECTS

PAGE

Absorption Based on the Spectrophotometry of Reddened B Stars, A Determination of Selective. *Jesse L. Greenstein* 151

Antares, Atomic Lines in the Spectrum of. *Dorothy N. Davis* 335

ϵ Aurigae, Note on Hall's Measures of. *G. P. Kuiper* 213

ϵ Aurigae, A Spectrophotometric Study of. *John S. Hall* 209

B Stars, A Determination of Selective Absorption Based on the Spectrophotometry of Reddened. *Jesse L. Greenstein* 151

γ Cassiopeiae in the Photographic Region, The Spectrum of. *Ralph B. Baldwin* 573

Color Indices of Stars from a Classification of their Spectra, On the Determination of. *W. W. Morgan* 460

Colors of Reflection Nebulae, The. *Jesse L. Greenstein* 581

Corona of June 8, 1937, The Total Light and Color of the Solar. *Joel Stebbins and A. E. Whitford* 225

Corona, Note on the Globular. *Dana K. Bailey* 74

Corona in the Total Eclipses of 1932 and 1934, Polarization of the Solar. *Willi M. Cohn* 284

Eclipsing Variable Star μ' Scorpii, The. *Paul Rudnick and C. T. Elvey* . 553

f-Values for Lines of *Fe* I and *Ti* I, Relative. *Robert B. King and Arthur S. King* 24

Fe I and *Ti* I, Relative *f*-Values for Lines of. *Robert B. King and Arthur S. King* 24

Fe II Lines in the Solar Spectrum, The Spark Spectrum of Iron, $\lambda\lambda$ 5016–7712 with Identifications of. *Arthur S. King* 109

Globular Cluster Messier 92, A Study of the. *J. J. Nassau* 361

H_2, Quadrupole Rotation-Vibration Spectrum of. *Hubert M. James and Albert Sprague Coolidge* 438

Hale, George Ellery, 1868–1938. *Walter S. Adams* 369

Helium and Hydrogen Content of the Interior of the Stars, On the. *Bengt Strömgren* 520

Hydrogen Content of the Interior of the Stars, On the Helium and. *Bengt Strömgren* 520

Hydrogen and Nitrogen in the Planetary and Stellar Atmospheres by their Rotation-Vibration Spectra, On the Possibility of Detecting Molecular. *Gerhard Herzberg* 428

Interstellar Lines, Studies Based on the Intensities and Displacements of. *Paul W. Merrill and Roscoe F. Sanford* 118

Interstellar Lines in the Yellow and Red, Unidentified. *Paul W. Merrill and O. C. Wilson* 9

Interstellar Sodium, Evidences for Complex Structure in Lines of. *C. S. Beals* 568

PAGE

Ionization and Recombination in the Theory of Stellar Absorption Lines and Nebular Luminosity. *S. Chandrasekhar* 476
Luminosity Function with Height above the Galactic Plane, The Change of the. *Jesse L. Greenstein* 577
M Dwarfs, On the Spectral Types and Luminosities of the. *W. W. Morgan* 589
Magnitude with a Wedge Photometer, Investigation of Standards of. *Alice H. Farnsworth* 352
Magnitudes and the International Standards, Photoelectric. *Frederick H. Seares* 257
Magnitudes for Polar Stars, Comparison of Leiden and Mount Wilson. *Frederick H. Seares* 280
Magnitudes of the Thirty Brightest Stars in the North Polar Sequence, The. *Joel Stebbins and A. E. Whitford* 237
Nebulae, The Colors of Reflection. *Jesse L. Greenstein* 581
Nebulae, Some New Spectra of Galactic. *Jesse L. Greenstein and L. G. Henyey* 70
Nebular Luminosity, Ionization and Recombination in the Theory of Stellar Absorption Lines and, *S. Chandrasekhar* 476
Nebular Spectrograph of the McDonald Observatory, The 150-Foot. *O. Struve, G. Van Biesbroeck, and C. T. Elvey* 559
Night Sky to Zenith Distance, The Relation of the Brightness of the. *Jessie Rudnick* 584
Nitrogen in Planetary and Stellar Atmospheres by their Rotation-Vibration Spectra, On the Possibility of Detecting Molecular Hydrogen and. *Gerhard Herzberg* 428
North Polar Sequence, The Magnitudes of the Thirty Brightest Stars in the. *Joel Stebbins and A. E. Whitford* 237
Nova Herculis 1934, Atlas of the Spectrum of. *F. J. M. Stratton* . . 588
ζ Orionis, A Be Star. *Ernest Cherrington, Jr.* 204
Parallaxes, A Comparison of Spectroscopic and Trigonometric. *Henry Norris Russell and Charlotte E. Moore* 389
Parallaxes with the 60- and 100-Inch Reflectors, The Photographic Determination of Stellar. *Adriaan van Maanen* 424
b Persei, The Orbit of. *J. F. Heard* 72
Photoelectric Measures of HD 199140. *C. M. Huffer* 76
Planets, On the State of Matter in the Interior of the. *Rupert Wildt* . . 508
Proper Motion, Nine White Stars of Large. *G. P. Kuiper and C. K. Seyfert* 78
Proper Motion Stars, Notes on. *G. P. Kuiper* 592
Radiative Transfer, New Solutions of the Equation of. *Lyman Spitzer, Jr.* 1

Reviews:

Dyson, Sir Frank, and R. V. D. R. Woolley. *Eclipses of the Sun and Moon* (D. H. Menzel) 218
Gauss, Carl Friedrich. *Inaugural Lecture on Astronomy and Papers on the Foundations of Mathematics* (Otto Struve) 217
